

ABSTRACT OF THE DISCLOSURE

An apparatus is provided for packaging fasteners such as screws, that is to be worn by a user. The packaging device includes a tray with a plurality of wells, each well accommodating the shank of a respective fastener. An attachment device is used for securing a tray to a user. In a preferred dispensing method, fasteners may be dispensed from the tray using a magnetized screwdriver bit which is placed over the head of the fastener, followed by withdrawing the screwdriver bit with the fastener magnetically attached.
